Sample Questions and Answers from the 6th Edition

Example 1: Phylum Porifera

Question: What are the defining characteristics of sponges (Phylum Porifera)?

Answer: Sponges are characterized by their porous bodies, lack of true tissues, presence of specialized cells like choanocytes, and a simple body plan that facilitates water flow through their bodies. They exhibit asymmetry or radial symmetry and reproduce via both sexual and asexual methods.

Example 2: Animal Development

Question: Describe the process of gastrulation in embryonic development.

Answer: Gastrulation is a crucial phase where the blastula reorganizes into a multilayered structure called the gastrula.
