Introduction to Agriculture in Geography

Agriculture is the primary activity that involves the cultivation of crops and rearing of animals for food, fiber, medicinal plants, and other products used to sustain human life. It forms the backbone of the Indian economy, providing employment to a significant portion of the population. In CBSE Class 10 Geography, the chapter on agriculture discusses its importance, types, and the various factors influencing agricultural productivity.

Importance of Agriculture

Agriculture holds a pivotal role in India's economy for several reasons:

- Source of livelihood for more than 50% of the population.
- Contributes around 17-20% to the GDP.
- Provides raw materials to industries like textiles, sugar, and food processing.
- Ensures food security and sustains the rural economy.

Types of Agriculture

Agriculture in India can be broadly classified into two main types based on the scale and intensity of farming:

1. Subsistence Agriculture

This type of agriculture is practiced mainly for self-consumption by farmers. It is prevalent in regions with small and marginal farmers. Features include:

- Low levels of technology and input use.
- Traditionally practiced with simple tools.
- Limited surplus for sale or trade.

2. Commercial Agriculture

This type aims at producing crops for sale in the market. It involves large-scale farming with modern technology, irrigation, and chemical fertilizers. Features include:

- High input use and mechanization.
- Focus on cash crops like cotton, sugarcane, and tea.
- Connected to markets and export opportunities.

Factors Influencing Agriculture

Several natural and human factors influence agricultural productivity:

Natural Factors

- Climate: Temperature, rainfall, and humidity determine the types of crops grown.
- Soil: Fertile soil supports high yields; soil types vary across regions.
- Water: Availability of water for irrigation affects crop growth.

Human Factors

- Technological Development: Use of modern tools, fertilizers, and pesticides.
- Farmers? Education and Skills: Knowledge about crop management.
