Answer: c) Session

Explanation: The Session layer (Layer 5) manages sessions between applications. It handles connection establishment, maintenance, and termination, ensuring data exchange is synchronized and reliable.

Q3: Which protocol is primarily used for securely transmitting web pages?

- a) HTTP
- b) HTTPS
- c) FTP
- d) SMTP

Answer: b) HTTPS

Explanation: HTTPS (Hypertext Transfer Protocol Secure) encrypts data transmitted between a web browser and server, providing confidentiality and security for web communications.

Q4: What is the purpose of subnetting in IP networks?

- a) To increase the number of available IP addresses
- b) To divide a large network into smaller, manageable segments
- c) To assign IP addresses dynamically
- d) To improve wireless signal strength

Answer: b) To divide a large network into smaller, manageable segments

Explanation: Subnetting partitions a large network into smaller subnets, enhancing security, performance, and manageability by reducing broadcast domains.

MCQs often ask about which layer handles certain functions or protocols, helping test your conceptual clarity.

IP Addressing and Subnetting

IP addresses are vital identifiers in networks. Multiple choice questions frequently challenge understanding of IPv4 and IPv6, subnet masks, and CIDR notation. For example:

- How to calculate the number of hosts in a subnet
- Recognizing private vs. public IP addresses
- Converting between binary and decimal IP addresses

Network Devices and Their Functions

An understanding of hardware components is crucial. MCQs may ask about:

- The difference between a hub and a switch
- The roles of routers and modems
- The function of firewalls and intrusion detection systems

Protocols and Data Transmission

Protocols govern how data is formatted, transmitted, and received. MCQs may focus on:

- The purpose of TCP's three-way handshake
- Differences between TCP and UDP
- Functions of DNS and DHCP

Strategies for Mastering Networking MCQs

To excel in networking multiple choice questions, consider the following strategies:
