Introduction to Economics

Understanding the foundation of economics is crucial for grasping its broader applications. Kennedy's notes begin with an introduction that clarifies what economics entails and why it is vital in everyday life.

What is Economics?

Economics is the social science that studies how individuals, firms, and governments make choices to allocate scarce resources to satisfy their unlimited wants and needs. It examines both the decision-making processes and the outcomes of these choices.

Types of Economics

Kennedy distinguishes between two main branches:

- **Microeconomics:** Focuses on individual agents such as households and firms, analyzing supply and demand, pricing, and market structures.
- **Macroeconomics:** Looks at the economy as a whole, including topics like inflation, unemployment, economic growth, and fiscal policy.

Fundamental Economic Concepts

A solid understanding of basic concepts forms the backbone of economic analysis. Kennedy's

notes emphasize key terms and their significance.

Scarcity and Choice

Scarcity refers to the limited availability of resources relative to unlimited wants. Because resources are finite, choices must be made, leading to opportunity costs—the value of the next best alternative foregone.

Opportunity Cost

The cost of forgoing the next best option when making a decision. Recognizing opportunity costs helps in making rational choices.

Supply and Demand

The core mechanism influencing prices and quantities in markets:

- **Demand:** The quantity of a good or service consumers are willing and able to purchase at various prices.
- **Supply:** The quantity producers are willing and able to sell at various prices.
- **Equilibrium Price:** The price at which the quantity demanded equals the quantity supplied.

Market Equilibrium and Price Mechanism

Markets tend toward equilibrium through price adjustments, balancing supply and demand. Price acts as a signal guiding resource allocation.

Economic Systems and Structures

Kennedy outlines different economic systems and how they organize economic activity.

Types of Economic Systems

- **Market Economy:** Decisions are driven by individual choices and market forces; minimal government intervention.
- **Command Economy:** The government controls resources and makes most economic decisions.
- **Mixed Economy:** Combines elements of both market and command systems.

Market Structures

Understanding how firms compete is vital:

- **Perfect Competition:** Many firms, identical products, free entry and exit.
- **Monopoly:** Single firm controls the entire market.
- **Oligopoly:** Few firms dominate the market.
- **Monopolistic Competition:** Many firms sell differentiated products.

Macroeconomic Indicators and Policies

Kennedy emphasizes the importance of macroeconomic indicators in assessing economic health and guiding policy decisions.

Key Indicators

- **Gross Domestic Product (GDP):** Total value of all goods and services produced within a country over a period.
- **Unemployment Rate:** Percentage of the labor force that is unemployed and actively seeking work.
- **Inflation Rate:** The rate at which the general price level for goods and services rises.
- **Balance of Payments:** Record of all economic transactions between a country and the rest of the world.

Fiscal and Monetary Policies

- **Fiscal Policy:** Government adjusts spending and taxation to influence the economy.
- **Monetary Policy:** Central bank manages money supply and interest rates to stabilize the economy.

Market Failures and Government Intervention

Kennedy's notes explore situations where markets fail to allocate resources efficiently and the role of government in correcting these failures.

Types of Market Failures

- **Public Goods:** Non-excludable and non-rivalrous goods, leading to free-rider problems.
- **Externalities:** Costs or benefits of economic activities not reflected in market prices.
- **Negative Externalities:** Pollution, for example.
- **Positive Externalities:** Education, vaccination.
- **Information Asymmetry:** When one party has more or better information than the other.

Government Policies to Address Failures

- Regulation and legislation
- Taxation and subsidies
- Provision of public goods
- Creating awareness to reduce information asymmetry

Economic Growth and Development

Kennedy highlights factors contributing to economic growth and strategies for sustainable development.

Determinants of Economic Growth

- Capital accumulation
- Technological innovation
- Human capital development
- Institutional quality

Challenges to Growth

- Poverty and inequality
- Environmental degradation
- Political instability
- Inadequate infrastructure

International Economics

In Kennedy's notes, the global aspect of economics is addressed through trade, exchange rates, and globalization.

Trade Theories

- **Absolute Advantage:** When a country can produce a good more efficiently than others.
- **Comparative Advantage:** When a country specializes in goods where it has the lowest opportunity cost.

Trade Policies and Agreements

- Tariffs and quotas
- Free trade agreements (e.g., NAFTA, EU)
- World Trade Organization (WTO) roles

Exchange Rates and Balance of Payments

Kennedy explains how currency values fluctuate and impact trade, along with the importance of maintaining a balanced international account.
